

MEN'S Services

Individualized Outcome-Driven Treatment Programs to **HELP MEN RECOVER AND LEAD HEALTHY LIVES**

*Our Men's Programs are tailored to meet the needs of each individual, focused on **solutions, support and results.***

Riveon provides a variety of assessment and screening options to fit your needs and availability. To schedule an appointment for an assessment, **please call our Intake Services Department at 440.989.4900, select option #2.** Walk-in assessments are available Monday–Thursday.

riveon
MENTAL HEALTH AND RECOVERY

DAY TREATMENT

The goal of Riveon's Day Treatment Program is to **help our customers develop the support, skills and tools that will allow them to remain abstinent and recover from this chronic, progressive and fatal disease.** This will require that individuals use these skills and take responsibility to manage their recovery. Groups are conducted 5 days per week with additional family and individual therapy sessions.

INTENSIVE OUTPATIENT PROGRAM

Our Intensive Outpatient Program (IOP) is a comprehensive treatment approach for men which includes an initial evaluation, educational groups, group therapy as well as individual and family therapy sessions and 12-step support groups. **Our goal is to help men develop skills and tools that will lead them to recovery and overall wellness.** Groups are conducted 3 days per week for 3 hours.

LOW INTENSITY TREATMENT (CO-ED)

Our Low Intensity Treatment is **designed for men and women experiencing early-stage alcohol, drug or tobacco problems.** The treatment includes participation in education groups for approximately 6 to 12 sessions. Individualized Counseling & Family Education is also available. These sessions assist individuals and their loved ones in determining the most appropriate next steps for recovery.

MEDICAL SERVICES—AMBULATORY DETOX

The Ambulatory Detox Program was created as a result of the overwhelming need for those suffering from opiate addiction and the limited availability of detox beds. Ambulatory Detox is an outpatient service that **assists individuals through a safe, medically monitored withdrawal from opiates.** It includes a complete medical evaluation, medications to ease the distress of physical withdrawal, and immediate placement in the appropriate level of rehabilitation.

MEDICATION ASSISTED TREATMENT (MAT)

Riveon provides Medication Assisted Treatment to individuals struggling to recover from addiction. Services are provided through a Riveon **physician who is licensed in addiction medicine.** Medication assistance may include Suboxone, Vivitrol, or Naltrexone. Customers must meet eligibility criteria and must be participating in primary treatment.

FAMILY PROGRAMMING

Riveon Family Programming is offered as an open-ended educational support group. It is designed and conducted **primarily for parents, spouses and other family members who are concerned about a loved one's harmful use of alcohol or other drugs.** This program is also open, **free of charge,** to any individuals within the community that may have a loved one struggling with addiction.

AFTERCARE

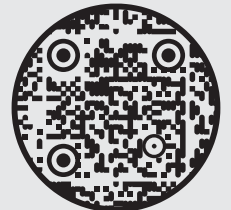

The last phase of an individual's recovery is our Aftercare program. This program **provides a strong support network for the individual** until he can successfully maintain his recovery on his own.

TRANSPORTATION

Transportation is available for men while in treatment at **certain locations.**
